

# SPRINT 2 PLAN

---

Product: HomeMe

Sprint Completion Date: 5/16/2017

Revision Date: 5/2/2017

## **Goal:**

To link all the pages together.

## **User stories:**

User Story 1: As a landlord, I would like to list my properties for rent

User Story 2: As a user, I would like to see houses based on a location I input

User Story 3: As a user, I would like to send my profile to a future landlord

## **Task Listing:**

1. Add more fields to the landlord page (ex. Picture posting)  
`db.define_table('images',  
 Field('picture', 'upload', uploadfield='picture_file')  
 Field('picture_file', 'blob')`
2. Be able to navigate between all pages implemented (#1 PRIORITY)
3. Create new page containing property listings (or merge with post page somehow?)
4. Apply button: click it, landlord see link to tenant's profile, contact information
  - a. Right now, anyone can click on a post's author and see the profile
5. Add a search function to filter results based on city/state

## **Story Points:**

1. 1
2. 13
3. 8
4. 8
5. 5

Time Expected per Task (see above):

1. 2 hours
2. 10 hours
3. 3.5 hours
4. 3.5 hours
5. 2.5 hours

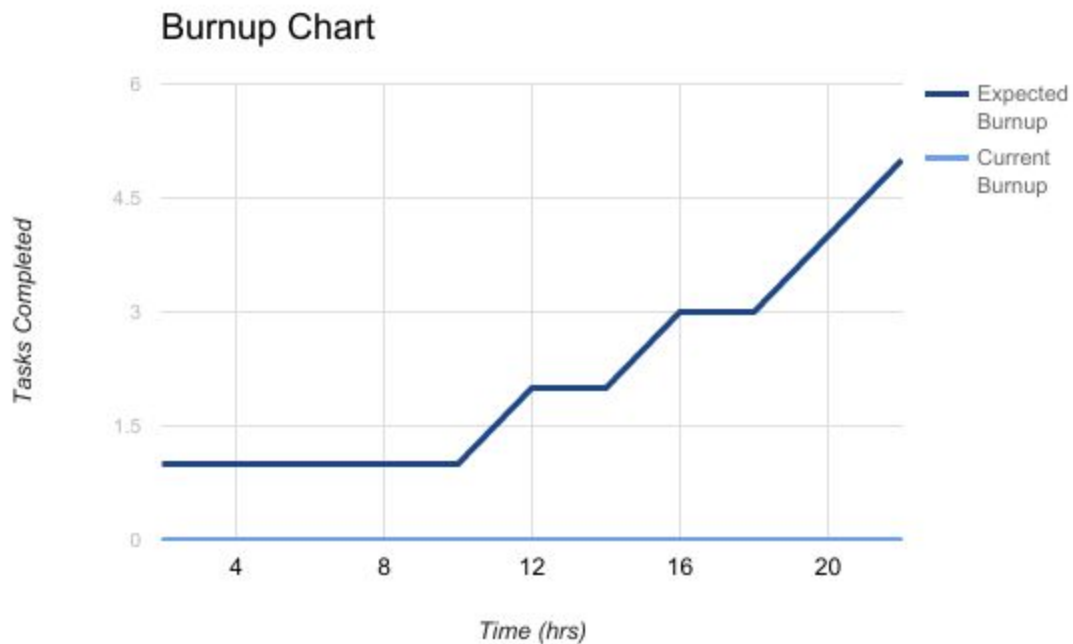

### Team Roles:

Hanlin Chen: Co-scrum master, full-stack developer  
Leslie Lau: Product owner, UX designer  
Josh Sibayan: Co-scrum master, front-end developer  
Soham Saha: Back-end developer  
Andrew Johnson: Full-stack developer

### Initial Task Assignment:

Hanlin Chen: task 4
